NOW, THEREFORE, BE IT

RESOLVED that Local Law No. of 2016 be and it hereby is adopted, which Local Law reads as follows:

**TOWN OF NORTH HEMPSTEAD
LOCAL LAW NO. OF 2016
A LOCAL LAW AMENDING CHAPTER 70 OF THE TOWN CODE
ENTITLED “ZONING”**

BE IT ENACTED by the Town Board of the Town of North Hempstead, as follows:

Section 1. Legislative Intent.

The Board finds that it is in the best interest of the Town of North Hempstead to make amendments to Chapter 70 entitled “Zoning” in order to establish restrictions related to the advertising of electronic cigarettes, liquid nicotine and hookah tobacco in any outdoor area within 500 feet of any park or school, or within the interior of any building or structure which is within 500 feet of any park or school, when such advertisement is within five feet of any exterior window or any door which is used for entry or egress to the building or structure by the public; except that such advertisements may be placed or maintained in the interior of any such premises where they are parallel to said windows or entryways and face inward or are affixed to a wall panel or similar fixture that is perpendicular to said windows or entryways.

Section 2.

Chapter 70, Article XXIB, § 70-201.6 of the Town Code is hereby amended as follows:

§ 70-201.6. Tobacco **and electronic cigarette** advertising regulations.

A. Legislative intent and findings.

~~[(1) The Town Board and the staff of the Town of North Hempstead have conducted land use studies of the location of tobacco advertisements in proximity to schools, parks and child day care centers. In addition, the Town has examined the actions and codes of other municipalities, including the City of New York, the Town of Huntington and the City of Long Beach.]~~

~~[(2)]~~1 The Town Board of the Town of North Hempstead finds that restricting the exposure of minors to advertising regarding tobacco and tobacco products is constitutional when achieved through reasonable, targeted limitations on such advertising in the vicinity of schools and other locations where it is well established that children tend to congregate. It is the intention of the Town Board to enhance and augment compliance with and enforcement of federal, state and local laws prohibiting the sale or distribution of tobacco products to minors, and to protect such minors against such illegal sales.

~~[(3)]~~2 The Centers for Disease Control and Prevention has reported that, while the rate of adult smoking of tobacco products has decreased nationwide by 50% between 1971 and 1993, the rate of smoking among all high school students has increased by 26% during the years 1991 through 1996, and ~~[now stands]~~ **in 2000 stood** at the highest rate since 1981. It is further noted that this dramatic increase has occurred contrary to and at variance with the laws of all 50 states prohibiting sale and distribution of tobacco products to minors, and the pledge of all tobacco product manufacturers to

adhere to a voluntary industry code prohibiting advertising of such products in a manner appealing to minors.

([4]3) In 1991, a study of the Journal of the American Medical Association concluded that "...cigarette advertising encourages youth to smoke and should be banned." In 1994, a report of the National Institute of Medicine stated that "...the substantial convergent evidence that advertising and promotion increase tobacco use by youth is impressive and ... provides a strong basis for legal regulation." In 1995, a report of the Federal Centers for Disease Control and Prevention found that "...cigarette marketing practices appeared to be the most likely to account for [the] increase in teen smoking initiation rates."

([5]4) In 1997, Liggett & Myers, Inc., a cigarette manufacturer, made the following acknowledgement in executing a settlement agreement with the Attorney Generals of 17 states, including the State of New York: "...Liggett acknowledges that the tobacco industry markets to 'youth,' which means those under 18 years of age..."

([6]5) Based upon the preponderance of the evidence that tobacco products are advertised and promoted to minors, and that the rate of use of tobacco products by minors has drastically increased contrary to legislation prohibiting the sale or distribution of such products to minors, the Town Board of the Town of North Hempstead hereby finds and declares it to be in the best interests of minors residing and/or otherwise present within the Town to enact affirmative, reasonable and constitutionally permissible restrictions on the advertising of tobacco products.

([7]6) In enacting this legislation, it is the intent of the Town Board to promote compliance with and enforcement of federal, state and local laws prohibiting sale or distribution of tobacco products to minors, and therefore, in deference to the protections afforded by the First Amendment to the Constitution of the United States, this legislation has been narrowly crafted to place reasonable time, place and manner restrictions on such advertising in those locations where it is well established that minors tend to congregate, while not imposing restrictions on such advertising clearly directed at adults.

(7) In August 2016, the Food and Drug Administration issued new rules clarifying its own definition of "tobacco products" as any product made or derived from tobacco that is intended for human consumption, including any component, part, or accessory of a tobacco product. As nearly all the nicotine currently used in electronic cigarette devices is derived from tobacco leaves, the Food and Drug Administration has imposed federal minimum age standards on electronic cigarette products and devices.

(8) The Centers for Disease Control and Prevention has reported that nicotine use is harmful, especially to adolescents. Nicotine exposure at a young age may cause lasting harm to brain development, promote addiction, and lead to sustained tobacco use. The Centers for Disease Control has unequivocally provided that there is no "safe" nicotine delivery for a child or teen.

(9) According to the Centers for Disease Control and Prevention, e-cigarette use among teens tripled between 2013 and 2014, and from 2011 to 2015, the use of e-cigarettes increased nearly 10 times for high schoolers. E-cigarettes are now the primary form of tobacco use amongst teens. Furthermore, after e-cigarettes and cigarettes, the Centers for Disease Control and Prevention reports that hookah tobacco is the third most used form of tobacco used by middle schoolers.

(10) In a 2016 report, the Centers for Disease Control and Prevention recommended that states and communities work to limit where and how e-cigarettes are sold, and reduce ad exposure.

(11) This Board further finds that e-cigarette manufacturers have marketed their products to appeal to and attract young people and these products are commonly referred to as "training wheels" for traditional cigarettes.

(12) Therefore, the purpose of this legislation is to restrict advertising of electronic cigarettes, liquid nicotine and hookah tobacco in any outdoor area within 500 feet of any park or school, or within the interior of any building or structure which is within 500 feet of any park or school, when such advertisement is within five feet of any exterior window or any door which is used for entry or egress to the building or structure by the public; except that such advertisements may be placed or maintained in the interior of any such premises where they are parallel to said windows or entryways and face inward or are affixed to a wall panel or similar fixture that is perpendicular to said windows or entryways.
